

A WHOLE NEW POINT OF VIEW.

It's more than a window. It's a whole new point of view. At Ply Gem Windows, we have a different view for the way the window business should be run. We believe you should have access to all of the top quality styles and brands across the country. That's why we've taken our entire portfolio of brands, brands that you know and trust, and given them one name – Ply Gem Windows. With this one name comes a lot of big advantages, starting with a national manufacturing and distribution network. Pair that with our commitment to customer service, sustainable practices and wide variety of window styles that fit all of your design needs, and you'll get the right window for every project and every budget.

And, because we're part of the Ply Gem family, you know you'll always have access to leading brands. Windows, doors, siding and accessories, stone veneer, fence and rail, rainware, shutters and designer accents, we have something for every project. We work with residential builders, remodelers, architects, distributors and dealers to help build sales. When you combine over 50 years of experience, industry-leading customer service, and trusted local relationships you've got a company you can count on. **Ply Gem. Building products.**

Building success.

Built to last. Made to impress. You have a vision for how you want your replacement windows to look. Ply Gem Windows Pro Series can help you realize that vision. Every window is designed to fit your needs. You'll find the right sizes, the right designs and the right solutions to help make your window replacement project a success.

A WHOLE NEW POINT OF VIEW.

EXPLANATION OF GLASS PACKAGES

PERFORMANCE COMPARISON

The lower the U-Factor, the greater the insulation value. R-Value is the inverse ($R=1/U$) of the U-Factor. Total Unit Factors determined per NFRC-100 (National Fenestration Rating Council). Chart shows relationship between performance and Ply Gem Windows glass package options, not including energy package upgrade.

*Ply Gem Windows R-5 products meet or exceed a U-Factor of 0.20 on fixed units & 0.22 on operating units.

LOW-E GLASS PACKAGES

Our Low-E glass packages combine Low-E and Warm Edge spacer options, providing insulating glass options to meet your specific needs. Our Low-E glass packages provide better performance in regions with hot summers and cold winters. Our Low-E^{SC} (solar cooling) glass package is optimized for regions with significant indoor cooling and glare reduction requirements. Our Low-E glass packages can be combined with capillary tubes to address performance needs in high elevation applications.

Low-E – One lite of Low-E

Low-E^{SC} – One lite of solar cooling Low-E

Low-E2+[‡] – One lite of Low-E and one lite of Interior Surface Low-E

Low-E2^{MAX}‡ – Triple-pane with two lites of Low-E with an interior glass substrate

Low-E3^{MAX}‡ – Triple-pane with two lites of Low-E and one lite of Interior Surface Low-E

[‡] These glass packages are combined with capillary tubes to address performance needs in high elevation applications.

HP GLASS PACKAGES

Our HP glass packages combine Low-E with argon gas fill and Warm Edge spacer options, providing high-performance insulating glass options to meet your specific needs. Argon is a safe, odorless, colorless gas, which is heavier, or denser, than air. When used in conjunction with Low-E glass, argon provides better insulation. That's because heat and cold do not pass through argon gas as easily as through air. Argon is nontoxic and presents no human health or environmental concerns. HP glass package is also available with a solar cooling (^{SC}) option for regions with significant indoor cooling and glare reduction requirements.

HP – One lite of Low-E and argon gas fill

HP^{SC} – One lite of solar cooling optimized Low-E and argon gas fill

HP2+ – One lite of Low-E and one lite of Interior Surface Low-E with argon gas fill

HP^{MAX} GLASS PACKAGES (triple-pane)

Our HP^{MAX} glass packages are triple-pane units that combine Low-E with two chambers of argon gas fill and Warm Edge spacer options, providing enhanced high-performance insulating glass options to meet your specific needs.

HP2^{MAX} – Triple-pane with two lites of Low-E with an interior glass substrate and two chambers of argon gas fill

HP3^{MAX} – Triple-pane with two lites of Low-E and one lite of Interior Surface Low-E and two chambers of argon gas fill

WHAT ARE R-5 WINDOWS?

High-performance R-5¹ windows are highly insulating windows with a whole-window R-Value of 5 (a U-Factor of around 0.2). Most of our Pro series products can be configured as R-5 units. These products are the top tier of energy efficient windows for cold and mixed climates.

ENERGY STAR[®] windows have a U-Factor of around 0.3. Reducing the U-Factor from 0.3 to 0.2, with high-performance R-5 windows, reduces average heat loss through the window by more than 30%,² and saves consumers like you money on energy bills.

¹ R-5 = U-Factor of .22 or lower for operating units; .20 for fixed units

² U.S. Department of Energy – Energy Efficiency and Renewable Energy EERE News, May 27, 2010

Dual wall flush fin for enhanced strength and enduring beauty

OVERALL FEATURES

- 1 Traditional and custom sizes
- 2 Vinyl won't conduct heat or cold, dramatically reducing frost and condensation
- 3 Pinch fusion-welded sash and mainframes for high strength and high energy efficiency
- 4 New Generation uPVC vinyl never needs painting or caulking and resists conducting heat and cold
- 5 Limited Lifetime Warranty means your windows are protected under the warranty for as long as you own your home
- 6 Standard energy efficient HP Glass (Low-E glass combined with argon gas fill) provides high performance, while our optional HP^{SC} (solar cooling) provides enhanced performance
- 7 Standard Warm Edge glass spacer system reduces thermal transfer around the glass perimeter by using a unique U-shaped channel to separate glass panes and interrupt the natural flow of heat to cold. Our optional Warm Edge+ spacer system upgrade enhances performance

Pro Series 200 corner cut shown with standard HP Glass and Warm Edge spacer system.

LIMITED LIFETIME WARRANTY

One of Life's Few Guarantees.

Life comes with few guarantees. Fortunately, Ply Gem Pro Windows offer you a permanent solution. Our custom vinyl windows offer more than construction quality, unmatched energy efficiency and low maintenance. They also offer a Limited Lifetime Warranty.

We believe so strongly in the durability of our windows that we back each window unit with our hassle-free Limited Lifetime Warranty. Lifetime means your windows are protected under the warranty for as long as you live in your home. And your warranty is transferable to the next homeowner, helping you protect your investment by increasing your home's resale value.

Wouldn't it be nice if you could feel so confident about everything you bought?

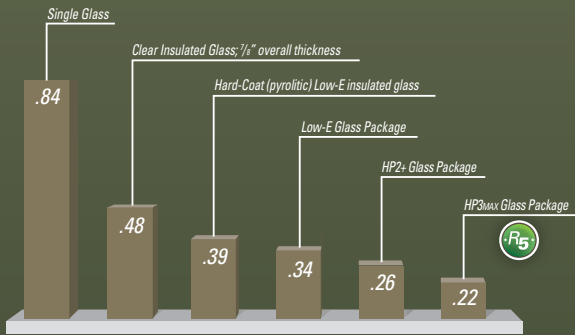

CUSTOM SIZING

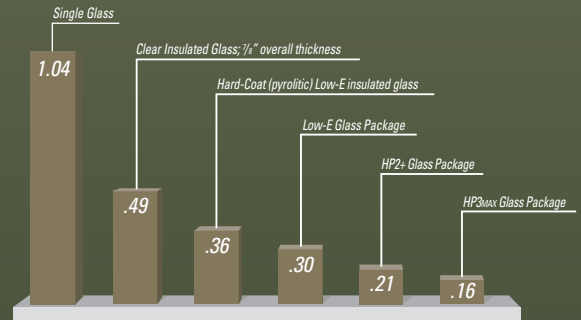

Ply Gem Pro windows and patio doors can be ordered in $\frac{1}{8}$ inch increments for any replacement application, providing a perfect fit and minimizing installation time and special trimming requirements.

GLASS COMPARISON — TOTAL UNIT — U-FACTOR

The lower the U-Factor the greater the insulation value.
 Total Unit Factors determined per NFRC-100 (National Fenestration Rating Council).
 The HP glazing option is certified to NFRC-100. Based on double hung product style.

GLASS COMPARISON — CENTER OF GLASS — U-FACTOR

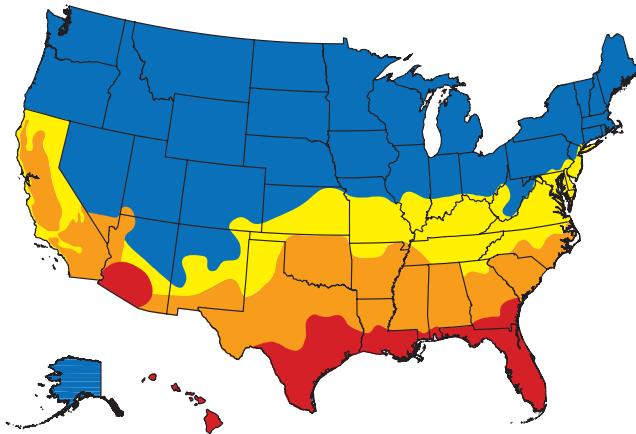

The lower the U-Factor the greater the insulation value.
 Center of glass factors calculated per Windows 5.2 simulation software (LBNL - Lawrence Berkeley National Laboratories).

5/8" Sculptured
GBG

1" Sculptured
GBG

7/8" SDL*

1 1/4" SDL*

* SDL is **only** available on 200 single hungs, 200 sliding windows, 700 casement & awning windows and 970 sliding patio doors.

FRAME OPTIONS

Dual wall flush fin, single wall flush fin, no fin,
1³/₈" nail fin setback with stucco key or J-Channel

Consult a Ply Gem Windows representative for
specific frame options for specific products in
this brochure.

COLOR OPTIONS

WHITE

BEIGE

Colors are reproduced as accurately as printer technology allows. Please see your authorized Ply Gem Windows representative for actual samples.

SCREEN OPTIONS

Fiberglass mesh is the standard insect screening material used on all Ply Gem Windows replacement products with available half- or full-screens. This product provides strong outward visibility and ventilation and will not rust, corrode or stain.

WHAT IS LOW-E?

Low-E glass has a secondary, very thin metallic dual layer coating. This allows the sun's heat and light to pass through the insulating glass, but, at the same time, works to reflect interior radiant heat back toward its source. Since Low-E coating reflects radiant heat waves, it helps keep your home warmer in the winter by trapping radiant heat and cooler in the summer by blocking it from your home. Low-E^{SC} is optimized for warmer climates by applying two heavier layers, through a patented process, resulting in blocking 73% of the sun's radiant heat from entering your home while providing superior insulation in cooler weather to save you energy year-round.

Our *Interior Surface Low-E* is engineered to have the characteristic window manufacturers and homeowners need most — lower U-Factor— and is applied to the surface of the glass you can touch inside your home, providing increased comfort and improved energy savings. One major benefit is a decrease in U-Factor of approximately 0.04, improving the energy efficiency so that many of our doors and windows meet new energy codes and ENERGY STAR® zone requirements. The neutral color with low haze and ultra-smooth surface of our Interior Surface Low-E provides a clearer view of the outdoors and can be cleaned with common household glass cleaners. No special instructions. Our Interior Surface Low-E is durable and scratch-resistant.

NATURAL LIGHT WITHOUT THE GLARE.

Ply Gem's Low-E glass has many advantages, such as minimal visible darkening. Our glass minimizes interior glare, reducing eyestrain and making it easier to watch television or look at a computer screen when bright sunlight fills a room.

* See page 6 for explanation of glass packages. Low-E2^{MAX}, Low-E3^{MAX}, HP2^{MAX} and HP3^{MAX} are not available on all products. See product pages for details. Contact your Ply Gem sales representative for a full list of Pro Series glass thickness options and ratings.

1. Consult your Ply Gem representative for a complete list of tinted glass types

2. Consult your Ply Gem representative for a complete list of obscure glass types. For limitations on triple pane obscure substitutions, see price book for details

3. Tempered glass standard on patio doors and skywall ceilings

Below is a glossary of our icons that you will see throughout the Ply Gem Windows Replacement brochures. These icons identify features and benefits for each window so you can easily understand what is available to you with each style.

CUSTOM SIZING

Ply Gem windows and patio doors can be ordered in 1/8" increments to accommodate any replacement application providing a perfect fit and minimizing installation time and special trimming requirements.

TRADITIONAL SIZING

Ply Gem windows and patio doors can be ordered in industry standard sizes used for vinyl windows which is ideal for new construction projects or replacing standard size units quickly and easily.

DP CERTIFIED

Ply Gem windows are tested to meet the air, water and structure requirements of AAMA/WDMA 101/I.S.2. With advanced level engineering and top-notch innovation, you are assured of the most durable, high-performing windows available nationwide.

HP GLASS

HP glass packages combine Low-E with argon gas fill and Warm Edge spacer options, providing high-performance insulating glass options to meet your specific needs. HP glass package is also available with a solar cooling (SC) option for regions with significant indoor cooling and glare reduction requirements.

HP^{MAX} GLASS

HP^{MAX} glass packages are triple-pane units that combine Low-E with two chambers of argon gas fill and Warm Edge spacer options, providing enhanced high-performance insulating glass options to meet your specific needs.

WARM EDGE TECHNOLOGY

Standard Warm Edge glass spacer system within Ply Gem Pro Series Replacement windows reduces thermal transfer around the glass perimeter by utilizing a unique U-shaped channel to separate glass panes and interrupt the natural flow of heat to cold. Warm Edge is one continuous piece creating a stronger, more energy efficient insulated glass unit. Plus, it flexes with glass expansion and contraction to ensure a strong seal for the life of the window.

WARM EDGE+ TECHNOLOGY

Optional Warm Edge Plus Spacer System has all of the features of the Warm Edge Spacer, but utilizes a new, less conductive material which provides a lower U-Factor.

NEW GENERATION VINYL

Wood or metal windows can stick when they swell or deteriorate from corrosion. New Generation Vinyl withstands harsh weather and wear-and-tear better. Ply Gem Pro Series Replacement windows are constructed with rugged, maintenance-free New Generation uPVC. Its low conductivity and high energy efficiency properties are ideal for Ply Gem's advanced window construction. And because vinyl's base color is solid through-and-through, you'll never need to paint or stain these windows.

PINCH FUSION WELDING

Ply Gem Pro Series Replacement windows are entirely fusion-welded – sashes and mainframes – to create a solid, one-piece unit that maintains its strength over the years. Our state-of-the-art fusion process ensures frame and sash corners won't have the excess variance found with other welding techniques.

PRO SERIES REPLACEMENT

PRO SERIES REPLACEMENT windows are available in single hung, sliding windows, picture, casement & awning, bay & bow, geometric, jalousie, skywall, garden window and French and standard sliding patio doors. Pro Series offers a number of grille options and is available in two different colors to match your décor.
