

**REFLECT-TEC®**  
HEAT REFLECTIVE ROOF AND WALL COATING

**SAVE ENERGY...  
REDUCE COOLING COSTS...  
IN ALL COLORS!**

## Features & Benefits

- REFLECT-TEC® is a revolutionary one-component, heat-reflective field-applied coating system with Kynar Aquatec® technology for renovating metal roof and wall surfaces. REFLECT-TEC® can provide reduced surface temperatures of over 50°F\* and reduce peak cooling loads!\*
- All REFLECT-TEC® standard colors are CRRC rated and their Total Solar Reflectance (TSR) values meet or exceed Energy Star and LEED™ requirements. Extremely low VOC (<50 g/L).
- Kynar Aquatec® technology, under license from Arkema, Inc., provides an enhanced weatherproof surface that resists dirt pickup, mold, mildew, and stains, eliminating the need for costly maintenance.
- Superior finish maintains increased reflectivity values for many years, unlike traditional elastomeric coatings - even in white!
- Lower surface temperatures lead to increased durability and superior fade resistance – even in darker colors!
- Restores and maintains color for faded and worn metal surfaces.
- Available in multiple colors to match your existing roof or to change the color of your roof to provide a fresh, new look!
- **Extended 10-year warranty** against fading, chipping, flaking, and peeling!

Increased Reflectivity - Even in Light Colors!

Kauai Lihue International Airport - Hawaii

\*Percentage of peak cooling load reductions are based on models generated from the "Roof Savings Calculator" Beta Release v 0.92 Oak Ridge and Lawrence Berkeley National Laboratories. Cooling costs savings, percentage of peak cooling load and surface temperature reductions will vary based on color chosen, geographical location, climate condition and substrate type. In some climates, there may be a heating penalty. For more information, see [www.texcote.com](http://www.texcote.com). ©2013, Textured Coatings of America, Inc.
